

PRESS RELEASE

TraWell Co signs an exclusive agreement with Sanycar, a leading company in the field of UV-C disinfection technology, for the design and manufacture of luggage sanitization machines to be installed at its points of sale.

Milan, June 15, 2020 – TraWell Co S.p.A. (AIM Italia, Ticker: TWL), leading global company in baggage protection and tracing services, has signed an exclusive agreement for the design and manufacture of luggage sanitization machines in order to improve services offered at Safe Bag points of sale within partner airports.

The purpose of the Agreement is to equip the TraWell Co Group with innovative equipment to improve services offered to airport travelers. More importantly, by enhancing its range of services, the TraWell Co Group aims to respond to current concerns about the spread of the Covid-19 contagion by sanitizing luggage and ensuring the safety of its customers.

Upon making appropriate arrangements with airport partners, baggage sanitation will be provided as part of the wrapping service without increase in the price, in order to protect the Group's clientele and increase sales volumes on core services.

"The agreement with Sanycar is an important strategic step for us, as it allows us to ensure the best offer in terms of services and technology to both our airport partners and our customers," says Rudolph Gentile, Chairman of TraWell Co, "the goal is, on the one hand, to meet the emerging need for hygiene against the risk of virus infection and, on the other, to extend the use of our services to a wider target of airport passengers. There are many opportunities in this field," continues Gentile, "so we hope to expand our collaboration with the Sanycar group in other areas in the near future."

"Since the beginning of our business," comments Gianni Delogu, Founder & CTO of Sanycar, "we have aimed to exploit the great potential of germicidal UV-C technology in new vertical markets with respect to ones that are already saturated, such as healthcare. The airport industry, in which we are proud to have been first movers, welcomed Sanycar's novel solutions, which are now available for the treatment of trolleys, safety and luggage trays."

"With TraWell, we immediately found common ground," adds the CEO of Sanycar, Carmine Mannea, "and a natural vocation for international development. Also for this reason, we are confident that this Agreement will prove an important starting point for a promising strategic relationship."
